WEB DEVELOPER

Full Stack Web Developer who creates visually appealing and user-friendly digital experiences. Driven to deliver seamless interactions for website users using technical skills like React, Django REST, and PostgreSQL. Known for consistently producing high-quality work ahead of schedule, with time for thorough testing before deployment.

TECHNICAL & INTERPERSONAL SKILLS

Languages: Python, JavaScript, HTML, CSS, SQL, Swift, SwiftUI

Libraries and Frameworks: React, Django REST

Databases and Other: Microsoft SQL Server, PostgreSQL, RESTful Routing, Power BI, Firebase, GitHub

Interpersonal Skills: Organized planning, problem-solving, leadership, clear bilingual communication (Arabic/English), creative interface design

TECHNICAL PROJECTS

Space App – [Frontend](#) / [Backend](#) [GitHub](#) | Platform – React, Django REST | HTML, CSS, JavaScript 11/2025

An interactive platform designed to help users organize and manage focus sessions within a visually engaging, space-inspired environment.

- Developed the frontend using React and connected it to a Django REST backend for smooth interaction.
- Built a dynamic circular timer and integrated ambient sound playback to enhance session focus.
- Designed a responsive UI with visual elements that reflect session duration as planets or stars.

ProMerge – Web Platform | Platform – JavaScript, HTML, CSS | OpenAI API, Firebase 06/2024

An intelligent web platform that automates official document creation by merging Word templates with Excel data into ready-to-send PDFs.

- Led the team by assigning tasks and supervising all project phases, ensuring smooth execution and timely delivery.
- Contributed to front-end development and Firebase integration, enhancing user experience and data handling.
- Utilized AI to analyze Word files and convert them into smart templates, streamlining document generation. Implemented automatic email delivery of generated PDF files, improving workflow efficiency

Hawalik | iOS App - Swift | SwiftUI 06/2023

An iOS app that empowers citizens to rent and lease cars directly from each other—no rental offices needed.

- Enabled car owners to list their vehicles after meeting quality standards, streamlining peer-to-peer rentals
- Developed secure and user-friendly rental flows between users, enhancing trust and ease of use.
- Utilized SwiftUI, Swift, Firebase, and MapKit to build a responsive and location-aware mobile experience.

EXPERIENCE

King Fahad Medical City, Cooperative training: 06/2024 - 08/2024

- Administrative and Technical Training Department, Executive Management of Human Capital
- Developed web and database applications using C#, Microsoft SQL Server, and HTML - enhancing internal workflows and data accessibility.
- Conducted business analysis and system design to support integration and mobile development initiatives—resulting in improved cross-platform functionality.

EDUCATION

Saudi Digital Academy | Software Development Bootcamp using Python: 480 hours | 11/2025

- Completed an intensive, project-based program focused on full-stack development using Python.
- Gained hands-on experience in building web applications, APIs, and integrating frontend-backend systems.

Saudi Electronic University: 05/2025

Bachelor's degree in Information Technology (Cybersecurity Track)

Tuwaiq Academy | Smart Phone Application Development Camp using Swift Language: 200 hours | 06/2023

- Completed an intensive training program focused on iOS app development using Swift, SwiftUI.
- Gained hands-on experience in applying Human Interface Guidelines, Figma prototyping.
